

# ENVR 2102: Introduction to Environmental Science

Environmental science is the study of human interactions with ecological systems. This interrelationship raises important questions about human alterations of ecological systems. We will consider social, political and economic aspects of environmental science and how these components may or may not coincide with sustainable use of natural resources.

**Credits:** 3

**Class Hours:** 3

**Prerequisites:**

ECOL 1201

GEOG 1001

**Department:** Art and Environmental Science
